KES 85

FOR SPEEDFORMER KMD SERIES

The KES 85 punch press completes the series SPEEDFORMER KMD perfect for a large-scale production with a wide range of applications.

The vertical perimeter punching technology allows an efficient and notch-free production of products made of (R)PET, PP, PS, CPET, OPS, PLA, PE and others.

Punch Press
KES 85

Easy stacking, ergonomic packing

Horizontal product stacking function

Fast and easy tool change

- Servo motor drives for film feed, punching stroke, ejector movements
- Proven vertical punching technology without lateral forces
- Integrated color touch panel, process- and user guided
- Teaching function allows efficient machine operation
- Automatic lubrication and optimized accessibility for maintenance

Suitable for SPEEDFORMER KMD 78, KMD 85 and KMD 90 and also for thermoforming machines from other suppliers.

Combined perimeter- and hole-punching with KES

Technical Data	KES 85
Maximum punching area	850 x 400 mm
Maximum tool dimensions	1230 x 495 mm
Maximum tool weight (block)	1100 kg
Maximum height of formed part	125 mm
Maximum film width	925 mm
Maximum production speed	120 cycles/min.
