Pick-up Stacker Compact. Combined stacking and packing into cartons

## Packaging Industry

# PUS / KIST / MCP

## REMOVAL AND STACKING UNITS FOR KTR SERIES

Removal and stacking units, and downstream processes: Our solution for you ranges from reliable standard units to tailor-made automation.

Optimise your production with individually adapted automation solutions from Kiefel and Mould & Matic.

Tailor-made automation

Removal and Stacking Units  
**PUS / KIST / MCP**

Pick-up Stacker Semi-Automatic: stacking and manually packing

Horizontal packing after Pick-up Stacker or printing units

KIST: vertical stacking for best product quality

**PUS series**

The pick-up stacker is available in three sophisticated basic designs. All variants have mandrel-guided removal and high capability with up to 50 cycles per minute for the best performance and quality.

**KIST stacking unit**

In addition to the well-known features such as reliable, mandrel-guided removal and a rubber/brush-free chute design, with up to 45 cycles per minute, the high-end vertical stacker sets new standards even for large-scale processing.

**Automatic packing and tailor-made automation**

From the versatile standard device to the high-quality, customer-oriented downstream.

**Kiefel, Mould & Matic and Bosch Sprang – your partners for efficient cup production.**

ESG Endless Stacking Unit: simple, reliable stacking
