

**SHARP
FORMER**

MACHINE FOR THE
APPLIANCE INDUSTRY

SHARP FORMER

Our newest innovation guarantees you an excellent price-performance ratio, low production costs and maximum output.

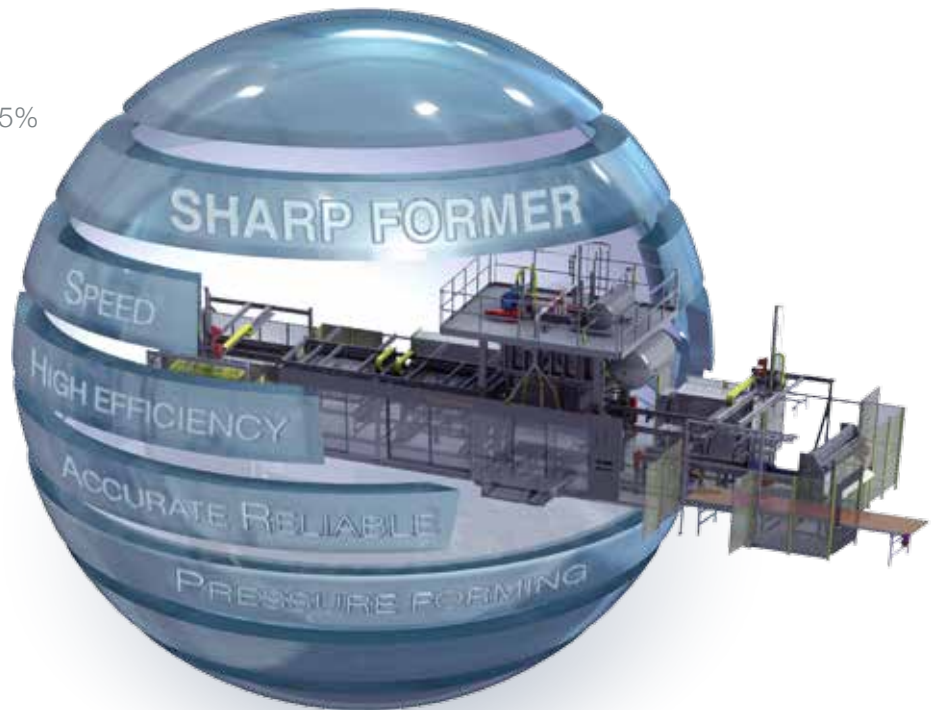

SPEED – dry cycle 24 sec.

HIGH EFFICIENCY – machine availability > 95%

ACCURATE – exact repeatability

RELIABLE – proven machine concept

PRESSURE FORMING – sharp contours

KID-CAT

CAT Computer Aided Teaching

The smart solution for high quality products

Your Advantages – A few short steps to your product recipe

- Reduced costs due to shorter set-up times for new products
- Faster results with less waste production
- User-friendly, intuitive operation of the machine
- Consistent recipe for each product
- Optimization of existing recepies

From sheet to product

- Just a few entries required: approx. 16 basic tool and material data entries and 9 yes/no selections
- Computer-aided compiling of process parameters
- Selectable production speed (target number of cycles/h)
- Process optimization during dry cycle
- Creation of new, customized recipes in just a few minutes

PROCESSING PLASTICS WITH POWER
